

UNIVERSITY OF OSTRAVA

Institute for Research and Applications of Fuzzy Modeling

**Methods for Decision Support in
Environment with Uncertainty –
Applications in Economics, Business
and Engineering**

Edited by
Jaroslav Ramík, Vilém Novák

Research report No. 23

January 2000

PROCEEDINGS
OF THE CZECH – JAPAN SEMINAR
held in Beskydy, Čeladná, hotel Prosper
5.9. – 8.9. 1999

Supported by:

International Collaborative Research Project between Czech Republic and Japan

**University of Ostrava
Institute for Research and Applications of Fuzzy Modeling
Bráfova 7, 701 03 Ostrava 1, Czech Republic**

Content:

1. J. Ramík (IRAFM Ostrava): Czech–Japan cooperation research project – Decision support in environment with uncertainty – recent development and new perspectives	1
2. M. Inuiguchi, T. Tanino (Osaka University) and J. Ramík J. Ramík (IRAFM Ostrava): Fuzzy relations with an oblique fuzzy vector and their applications to possibilistic linear programming	6
3. M. Royoke (JAIST Hokuriku): Adaptive fuzzy modeling for predicting ozone concentrations in Europe	11
4. Sung Shao Ching, M. Vlach (JAIST Hokuriku): On minimizing the number of late jobs with fuzzy processing times and due dates	17
5. T. Tanino, M. Tsurumi and M. Inuiguchi (Osaka): The core and the related solution concepts in cooperative fuzzy games	21
6. M. Vlach (JAIST Hokuriku), J. Ramík(IRAFM Ostrava): Generalized concavity in fuzzy optimization	30
7. J. Watada (Osaka Institute of Technology): Soft-computing approaches to portfolio selection problems	35
8. J. Ivánek (LISP Praha): On the correspondence between classes of implicational and equivalence quantifiers	96
9. J. Rauch (LISP Praha): Remarks to generalized association rules	105
10. R. Jiroušek (LISP Praha): Construction of multidimensional models, Part 1 – probabilistic approach	111
11. R. Vejanrová (LISP Praha): Construction of multidimensional models, Part 2 – possibilistic approach	119
12. J. Močkoř (IRAFM Ostrava): Fuzzy and non-deterministic automata	129
13. I. Perfilieva (IRAFM Ostrava): Fuzzy logic forms in approximation theory	134
14. M. Pokorný, I. Rehberger, P. Čermák (VŠB–TU Ostrava): Long-range predictive control strategy using fuzzy non-linear regression model	142

Available separately.
