

UNIVERSITY OF OSTRAVA

Institute for Research and Applications of Fuzzy Modeling

Fuzzy Concept Lattices and Related Structures

Radim Bělohlávek

Research report No. 31

April 1, 2000

Submitted/to appear:

Habilitation Thesis

Supported by:

grant no. 201/99/P060 of the Grant Agency of the Czech Republic and project VS96037 of the Ministry of Education of the Czech Republic

Contents

Preface	iv
Contents	ix
1 Motivation and basic concepts	1
1.1 Concept lattices	1
1.2 Fuzzy logic and fuzzy sets	6
1.3 A sketch of the treatise	13
2 Fuzzy concept lattices	14
2.1 L -contents, L -concepts, and L -concept lattices	14
2.2 Similarity relations in concept lattices	18
2.3 Logical precision in concept lattices	39
2.4 Concept equations	47
2.5 Illustrative examples	55
3 Fuzzy Galois connections, closure operators, and closure systems	65
3.1 L_K -Galois connections	65
3.2 L_K -closure operators and L_K -closure systems	88
4 Fuzzy order	105
4.1 L -order and lattice L -order	105
4.2 Main theorem of L -concept lattices	110
4.3 Dedekind-MacNeille completion	122
References	126
